PROFESSIONAL SUMMARY

A systems-thinking technologist bridging environmental policy, legal operations, and software engineering. Over five years of federal service at the U.S. Environmental Protection Agency transforming FOIA management through process innovation, data analysis, and cross-agency collaboration. Currently completing a Graduate Certificate in Software Design & Development at UW Bothell with one quarter remaining. Recently earned a 99.67 percent in Software Modeling Techniques, with work selected multiple times as a class exemplar, and passed the CompTIA Security+ exam. Proficient in Java, Python, C++, TypeScript, and modern development practices including memory profiling with Valgrind and web automation using JavaScript.

TECHNICAL SKILLS

Languages: Java, Python, C++, TypeScript, JavaScript, SQL

Frameworks & Tools: React, Flask, Pandas, NumPy, Tkinter, Git, Docker, Valgrind

Databases: SQL, PostgreSQL, Relational Database Design

Core Competencies: OOP, Data Structures & Algorithms, System Modeling (UML, DFD, threat analysis), Requirements Engineering, REST APIs, Agile/Scrum, Test-Driven Development, CompTIA Security+

TECHNICAL PROJECT PORTFOLIO

ColorGraft – Color Accessibility Toolkit (In Development) - *Python • OpenCV • React • TypeScript*

- Architecting color analysis pipeline to extract dominant palettes from images
- Designing color blindness simulation modules for 8 CVD variants with WCAG contrast validation
- Building React/TypeScript frontend for interactive palette manipulation

PatternMap – Accessible Map Overlay System (In Development) - *TypeScript • React • Node.js*

- Developing Chrome Extension to render SVG pattern overlays on Google Maps and Mapbox
- Building customizable texture library for non-color metadata encoding
- Integrating Web Speech API for voice-guided landmark descriptions

3D Image Generator (C++) - *C++ • Valgrind • Linux*

- Developed real-time 3D rendering engine with user-configurable parameters
- Used Valgrind for memory leak detection and performance optimization

FOIA Integrity Tool (Deployed at EPA, 2025) - *Python • Tkinter • File System Automation*

- Designed and deployed production tool adopted by EPA Region 10
- Automated file name sanitization; reduced manual cleanup time by 15 percent

Java OOP Library - *Java • JUnit*

- 20+ Java applications demonstrating OOP principles, data structures, and algorithms
- Comprehensive unit testing following industry best practices

Environmental Landscape Scanner (Team Project) - *LiDAR • Cloud Simulations • Python*

- Led a 5-person agile team in designing a mobile app concept using LiDAR and cloud simulations
- Developed user personas and SPICIER scenarios for engineers, farmers, and real estate agents
- Defined product scope and requirements for 3D environmental assessment and simulation

System Architecture & Modeling (Academic)

- Created data-flow diagrams with trust boundaries for threat analysis
- Applied Kano model and MoSCoW prioritization to feature planning

Full Portfolio: 30+ projects maintained on GitHub with documentation and tests (github.com/pitekopaga)

PROFESSIONAL EXPERIENCE

U.S. Environmental Protection Agency (EPA), Region 10 – Seattle, WA

Systems & Operations Specialist (2020–2026)

- Built Python automation tool adopted by EPA Region 10; reduced manual work by 15 percent
- Engineered custom SQL/Python reports adopted by National FOIA Office
- Served on national editorial board rewriting EPA's FOIAXpress User Manual (agency-wide standard)
- Appointed to FOIAXpress Customer Advisory Committee, influencing national system innovation
- Managed over 500 matters through full lifecycle; authored technical documentation
- Applied user research principles to design workflows, reducing user errors by 15 percent
- Served as eDiscovery Search Point of Contact, managing complex document reviews in Relativity

Peace Corps | Jamaica

Technology Lead | 2018 – 2020

- Led national Technology for Development Working Group; managed 12 IT projects & 30 volunteers
- Spearheaded Computer Aid program; deployed 300 donated computers to schools
- Designed WordPress sites for community organizations; trained staff on content management
- Authored quarterly reports to headquarters documenting activities and measurable indicators

Finca Sylvatica | Costa Rica

Founder & CEO | 2005 – Present

- Designed and maintain relational database cataloging 1,000 plant specimens across 15 years
- Managed 300 international volunteers; built fincasylvatica.com
- Founded and operate 21-acre botanical research center and ecological restoration site
- Forged strategic partnerships with scientific institutions including Organization for Tropical Studies

Education & Development

University of Washington | Bothell, WA

Graduate Certificate in Software Design & Development - Expected June 2026

- Software Architecture & Design Patterns, Advanced Data Structures & Algorithms, Database Systems & Data Modeling, Web Application Development, Cloud Computing Fundamentals, Agile/Scrum Methodologies, System Integration & Testing
- Development Philosophy: Combining rigorous academic training with practical application to build robust, scalable systems that solve real-world problems.
- CSS 507B Grade: 99.67% - work selected multiple times as class exemplar

University of Washington | Seattle, WA

Master of Forest Resources | 2020 | GPA: 3.9

- Peace Corps Masters International Program | Xi Sigma Pi Honor Society

The Evergreen State College | Olympia, WA | *Dual Bachelor's Degree, Art and Science* | 2014

Cascadia College | Bothell, WA | *Associate's Degree, Integrated Studies* | 2004

- Computer Software Engineering Studies | Grade: 4.0

Certification & Integrated Expertise

- CompTIA Security+ (March 2026)
- Google AI Essentials (September 2025) | AWS Cloud Practitioner (In Progress Q2 2026)
- MinnaLearn - Building AI (with Honors) (August 2025)
- MinnaLearn - Elements of AI (September 2025)
- LEED Green Associate (December 2016)

Languages: Spanish (Professional Working Proficiency)

Honors: SAF Student Diversity Scholar, Peace Corps Director's Distinctive Service Award, National Garden Club Scholarship and WSNLA Scholarship winner, WSNLA Grant awardee, WA Botanical Symposium scholar
