🧑‍💻 PROFESSIONAL SUMMARY

A systems-thinking technologist bridging environmental policy, legal operations, and software engineering. Over five years of federal service at the EPA transforming FOIA management through process innovation, data analysis, and cross-agency collaboration. Holds a UW Bothell Graduate Certificate in Software Design & Development (completed June 2026), CompTIA Security+ and Network+ certifications, and Microsoft Azure Fundamentals (AZ-900). Provides IT help desk support, administers legal systems (LMS, iManage), and serves as Product Owner on Agile team at Inslee Best.

🛠️ TECHNICAL SKILLS

Languages: Java, Python, C++, TypeScript, JavaScript, SQL
Frameworks & Tools: React, Flask, Pandas, NumPy, Tkinter, Git, Docker, Valgrind
Databases: SQL, PostgreSQL, Relational Database Design
Cloud Platforms: Microsoft Azure (fundamentals), AWS (fundamentals)
Core Competencies: OOP, Data Structures & Algorithms, System Modeling (UML, DFD, threat analysis), Requirements Engineering, REST APIs, Agile Product Owner, Test-Driven Development, CompTIA Security+, CompTIA Network+

🚀 TECHNICAL PROJECT PORTFOLIO

ColorGraft – Color Accessibility Toolkit (In Development) - *Python • OpenCV • React • TypeScript*
- Architecting color analysis pipeline to extract dominant palettes from images
- Designing color blindness simulation modules for 8 CVD variants with WCAG contrast validation
- Building React/TypeScript frontend for interactive palette manipulation

PatternMap – Accessible Map Overlay System (In Development) - *TypeScript • React • Node.js*
- Developing Chrome Extension to render SVG pattern overlays on Google Maps and Mapbox
- Building customizable texture library for non-color metadata encoding
- Integrating Web Speech API for voice-guided landmark descriptions

3D Image Generator (C++) - *C++ • Valgrind • Linux*
- Developed real-time 3D rendering engine with user-configurable parameters
- Used Valgrind for memory leak detection and performance optimization

FOIA Integrity Tool (Deployed at EPA, 2025) - *Python • Tkinter • File System Automation*
- Designed and deployed production tool adopted by EPA Region 10
- Automated file name sanitization; reduced manual cleanup time by 15 percent

Java OOP Library - *Java • JUnit*
- 20+ Java applications demonstrating OOP principles, data structures, and algorithms
- Comprehensive unit testing following industry best practices

Environmental Landscape Scanner (Team Project) - *LiDAR • Cloud Simulations • Python*
- Led a 5-person agile team in designing a mobile app concept using LiDAR and cloud simulations
- Developed user personas and SPICIER scenarios for engineers, farmers, and real estate agents

System Architecture & Modeling (Academic)
- Created data-flow diagrams for threat analysis and applied Kano model with MoSCoW prioritization

Testing & CI/CD Portfolio - *Python • Flask • Docker • GitHub Actions • Playwright • Locust*
- Built full-stack color vision test with Flask and Canvas API; achieved test coverage with unit, integration, E2E (Playwright), and load tests (Locust)
- Automated all tests in CI/CD pipeline using GitHub Actions, triggered on every push
- Containerized the application using Docker and Docker Compose for reproducible test environments

Full Portfolio: 30+ projects maintained on GitHub with documentation and tests (github.com/pitekopaga)

PROFESSIONAL EXPERIENCE

Inslee Best Doezie & Ryder, P.S. | Bellevue, WA

Legal Ops Analyst & Product Owner | April 2026 – Present (Hybrid)

- Oversee and maintain firmwide legal systems, including LMS and iManage
- Provide IT help desk support, troubleshooting, ticket resolution, and user training
- Serve as Product Owner on Agile/Scrum Tiger Team, managing backlog, prioritizing features, and collaborating with cross-functional stakeholders
- Drive process improvement and operational efficiency through documentation, workflow automation, and system configuration

U.S. Environmental Protection Agency (EPA), Region 10 – Seattle, WA

Systems & Operations Specialist (2020–2026)

- Built Python automation tool adopted by EPA Region 10; reduced manual work by 15 percent
- Engineered custom SQL/Python reports adopted by National FOIA Office
- Served on national editorial board rewriting EPA's FOIAXpress User Manual (agency-wide standard)
- Managed over 500 matters through full lifecycle; authored technical documentation
- Applied user research principles to design workflows, reducing user errors by 15 percent
- Served as eDiscovery Search Point of Contact, managing complex document reviews in Relativity

Peace Corps | Jamaica | *Technology Lead* | 2018 – 2020

- Led national Technology for Development Working Group; managed 12 IT projects & 30 volunteers
- Spearheaded Computer Aid program; deployed 300 donated computers to schools
- Designed WordPress sites for community organizations; trained staff on content management

Finca Sylvatica | Costa Rica | *Founder & CEO* | 2005 – Present

- Designed and maintain relational database cataloging 1,000 plant specimens across 15 years
- Managed 300 international volunteers; built fincasylvatica.com
- Founded and operate 21-acre botanical research center and ecological restoration site
- Forged strategic partnerships with scientific institutions including Organization for Tropical Studies

Education & Development

University of Washington | Bothell, WA

Graduate Certificate in Software Design & Development - Completed June 2026

- Software Architecture & Design Patterns, Advanced Data Structures & Algorithms, Database Systems & Data Modeling, Web Application Development, Cloud Computing Fundamentals, Agile/Scrum Methodologies, System Integration & Testing
- Full software development lifecycle: systems programming, test automation, CI/CD, containerization, requirements engineering, system modeling, and Agile product ownership

University of Washington | Seattle, WA

Master of Forest Resources | 2020 | GPA: 3.9

- Peace Corps Masters International Program | Xi Sigma Pi Honor Society

The Evergreen State College | Olympia, WA | *Dual Bachelor's Degree, Art and Science* | 2014

Cascadia College | Bothell, WA | *Associate's Degree, Integrated Studies, Computer Science* | 2004, 2025

Certification & Integrated Expertise

- **Microsoft Certified: Azure Fundamentals (AZ-900)** (October 2026)
- **CompTIA Network+** (October 2026); **CompTIA Security+** (March 2026)
- **GCSDD** – UW-Bothell (June 2026)
- Google AI Essentials (September 2025) | AWS Cloud Practitioner (In Progress Q3 2026)
- MinnaLearn - Building AI (with Honors) (August 2025); Elements of AI (September 2025)
- LEED Green Associate (December 2016)

Languages: Spanish (Professional Working Proficiency)

Honors: SAF Student Diversity Scholar, Peace Corps Director's Distinctive Service Award, National Garden Club Scholarship and WSNLA Scholarship winner, WSNLA Grant awardee, WA Botanical Symposium scholar
